Other short-term liabilities as a % of total public funds	Not Applicable
Other short-term liabilities as a % of total liabilities	55.70%
Other short-term liabilities as a % of total assets	40.16%

(vi) Institutional set-up for liquidity risk management

The Board of Directors holds the overall responsibility for managing liquidity risk within the Company. To facilitate effective oversight and execution, the Board has constituted an Asset Liability Management Committee ('ALCO'), comprising the Managing Director and other senior members of the management team. The ALCO is tasked with identifying and monitoring liquidity risk, establishing a robust framework for stress testing, formulating funding strategies, managing collateral, and periodically reviewing the company's liquidity risk management (LRM) practices. It is also responsible for integrating necessary changes in policies, procedures, and strategies related to LRM. The ALCO actively monitors asset-liability mismatches to prevent any undue concentration on either side of the balance sheet, in accordance with the liquidity thresholds and limits approved by the Board. The company has a Board-approved Asset Liability Management Policy that outlines the liquidity risk management framework, in line with the Reserve Bank of India's guidelines for NBFCs. This policy ensures that the company maintains adequate liquidity buffers, as per the limits prescribed by the Asset Liability Management Policy and the Board.
